

Hi so today i will be asking you to just browse the web like you usually do, and answer some questions I have along the way.

Please feel free to speak out loud while browsing the web, as it will be extremely helpful for my research and this project.

NOTES

- So can you tell me about how you got into Korean culture/entertainment?
 - Talk about parasite, never into BTS but recently because they have been showing up on a lot of American shows/award ceremonies...
- How often do you check into Korean entertainment?
 - Pretty frequently, a few times a day. It's just like any other social media platform since on social media, sometimes see recommended content in the discover page (instagram)
- What are the main reasons for using this website?
 - looking for news on the latest trends , looking at short video clips since she doesn't have much time to watch the whole show. Sometimes like to read the forum if theres a particular topic I see that interests her!
- Okay, I will now just observe how you would usually browse the website.
 - (Cydney goes onto Allkpop): on the lookout for the newest album/music video releases, become familiar with their style so haven't really opted for any other websites.
 - difficult to browse the content on my mobile phone. not mobile-friendly and there is no app t
 - option to have an account with this website, but no point of it unless community forums or buy something. website is not that interactive.
- Can you search up any news regarding Parasite's Oscar nomination this year?
 - What do you find most eye-catching/most important? The article's title,date or description.
 - mostly date or the word oscar in the headlines
- Do you experience any inconveniences while browning?
 - really want to browse through a specific type of news, about a specific celebrity and that is really hard to do on this website.
 - it would be nice if it was more personalized/curated.
 - be nice to be able to save an article or video to view for later.....

(Go to some other website, Dramabeans..)

- I see that you are going to a diff website for your film/drama interests. Why is that??
 - just prefer to browse a diff website for drama film related stuff. The other website is also much easier to navigate through.
 - usually spend more time on this website, since she likes watching films/dramas more than KPOP itself.
 - However, it would be nice if the two websites can be integrated into one platform!

Okay, thank you so much for allowing me to observe you performing some tasks!
